

New work

Construction & Assembly on-site

Our mechanical fitters will come on-site to assemble your systems and subsystems that have been developed and produced in our workshops. Our expertise means that we can incorporate frameworks, piping and various other kinds of machine.

◆ Our “New work” services include boiler works, sheet metal work and mechanics. More specifically, we can work on the construction and assembly of metal frames and piping for different industry sectors. We can work with partners where a comprehensive service is required (structural work, electrics, etc.).

► Our unique selling points

- Significant experience in industrial incineration
- Versatility (general activities)
- Flexible, proactive and readily available
- Direct relationship with the client
- Specific expertise in transferring complex machinery
- Back-up offered by our design office and factories

>> Our clients

We provide “New work” services for **the chemicals** and **paper industries**, as well as companies working with **the environment**.

Our resources

Our team

- Mechanics
- Piper fitters
- Boilermakers
- Welders
- Fitters

Every member of our team is equipped with a range of tools according to his/her area of expertise, as well as general tools: welding stations, handling equipment, etc.

SEMECA can provide the services it offers thanks to the synergy between the different subsidiaries of the group.
