

Specialist machines

Design

SEMECA's design office has more than 15 years of experience and expertise to draw on to respond to the specific needs of its clients. From drawing up technical specifications to installation on-site and commissioning, we can provide a whole range of services.

◆ Finding customised solutions

If you need us to, we can help you draw up your technical specifications. Your account manager will look at your needs to make sure we provide the most appropriate customised solutions:

- Analysis of your needs
- Costing
- Detailed description of the project
- Validation of solutions

◆ A range of areas of expertise

Tools, control models, transfers, ergonomics, storage, metallic construction, packaging, mechanical construction, steel work, etc.

▶ Our unique selling points

- A turnkey solution
- A comprehensive service based on the synergy between our expertise in surveys, design, production, installation, commissioning and maintenance
- 15 years of experience

>> Our clients

Our clients work mainly in **the automotive and food industry, chemicals and handling.**

Our resources

Our team

The SEMECA team in the “Specialist machines” department is made up of account managers who work with our design office and manufacturing workshops.

The methods we use are those of the design office and manufacturing workshops.

Our “Maintenance” department includes a team that specialises in repairs and maintenance for specialist machines.

The account managers’ responsibilities

- Involvement at the design stage to oversee the progress of the project
- Participation in the drafting of your technical specifications to define your expectations and needs
- Collaboration with our manufacturing teams
- Organisation of the integration of different systems for the mechanised-welding aspect of your machine (pneumatics, hydraulics, automation, electrical engineering, etc.)
- Supervision of checks before installation
- Optimisation of the layout of your machine with the design office
- Managing the assembly teams to make sure installation goes as planned
- Commissioning to make sure the machine runs as it should
