

# Steel Process

## Construction & Coordination

Specialising in the construction of boiler works and piping networks, the SEMECA group is the best choice of partner to analyse your needs and bring your projects to life. SEMECA has a cleanroom reserved for aluminium and stainless steel, as well as a qualified team specialising in this area.

### ◆ Built and/or installed facilities

- Piping
- Boiler works, tanks, frames and gangways
- Vats, crates, covers, cones and tanks for storage
- Cleaning stations and connections for packaging lines
- Drums, hoppers and reservoirs
- Automation, electricity and all kinds of facilities

### ▶ Our unique selling points

- Pre-assembly in the workshop
- Assembly and set-up on-site
- Production of stainless steel structures
- Complete production facilities
- Checks for welding using x-rays
- Experience of Clean-in-Place (CIP) stations

### >> Our clients

Our applications are numerous in **the food, pharmaceuticals, biotechnology, chemicals and cosmetics industries.**

# Our resources

## Our machinery

- Construction workshops between 1,000 and 2,500 m<sup>2</sup> depending on the site
- TIG MIG semi-automatic and automatic welding stations
- Folding machine
- Shearing machine
- Roller
- Punching machine
- Fleet of machining equipment

## Our team

Our site managers can make the most of all of the group's resources in terms of experienced staff and effective production tools. Our infrastructure means that we can pre-fabricate and pre-assemble products in the workshop. We can also work on our clients' sites with a range of tools to assemble, connect and commission equipment.

SEMECA has several teams of qualified welders and pipefitters.
